MOSTAFA RAFIUR WASIB

AI Project Lead | AI Engineer | Applied AI, Data & Business Systems

St. John's, NL, Canada | 709-219-4278 | mostafa.wasib73@gmail.com

linkedin.com/in/mostafa-wasib | github.com/mrw-soumik | mrw-soumik.github.io

PROFESSIONAL SUMMARY

AI Project Lead and AI Engineer with 5+ years of combined experience across applied AI, software development, business systems, machine learning, data analytics, and client-facing technical delivery. Lead and support multiple confidential AI and software client engagements from requirements discovery and feasibility assessment through planning, implementation, testing, deployment support, documentation, and handover. Combine hands-on technical work in Python, SQL, APIs, and cloud with business and systems analysis, requirements gathering, workflow analysis, Power BI reporting, testing, and client communication. Strong at turning ambiguous business and technical problems into practical, well-documented, testable solutions.

CORE SKILLS

AI & Machine Learning: Applied AI, Generative AI, LLMs, Retrieval-Augmented Generation, prompt engineering, structured outputs, NLP, semantic search, anomaly detection, forecasting, recommendation systems, feature engineering, model evaluation, scikit-learn, PyTorch, TensorFlow, LangGraph, LangChain, OpenAI, Anthropic Claude, AWS Bedrock.

Software, Backend & Cloud: Python, SQL, JavaScript, TypeScript, Node.js, FastAPI, Flask, REST APIs, Docker, CI/CD, GitHub Actions, AWS, AWS CDK, Microsoft Azure, Google Cloud, PostgreSQL, MySQL, infrastructure as code, monitoring, logging.

Data, BI & Business Systems: Business analysis, requirements gathering, workflow analysis, process improvement, SQL, ETL and data pipelines, data quality and governance, Microsoft Power BI, Power Query, Excel, Tableau, Microsoft 365, SharePoint, CRM workflows, reporting and dashboards, testing and UAT.

Project & Client Delivery: AI project leadership, project planning, scope and risk management, feasibility assessment, client communication, technical coordination, client demonstrations, testing and validation, technical documentation, handover.

PROFESSIONAL EXPERIENCE

AI Project Lead | Genesis Group Inc. / Genesis AI Garage | St. John's, NL

Apr 2026 - Present

- Lead confidential client-facing AI and software engagements from discovery and feasibility assessment through planning, implementation coordination, testing, documentation, and handover.
- Work directly with clients to clarify requirements, define scope, identify risks, set priorities, and align technical delivery with business needs.
- Coordinate contributors, milestones, technical reviews, demonstrations, progress communication, and delivery documentation.
- Bridge business requirements and technical execution across applied AI, data, software, and cloud initiatives while remaining hands-on in solution review, validation, and delivery readiness.

AI Engineer | Genesis Group Inc. / Genesis AI Garage | St. John's, NL

Jan 2025 - Mar 2026

- Developed and supported AI, machine-learning, data, API, and cloud workflows for confidential client engagements using Python, JavaScript, TypeScript, Node.js, FastAPI, REST APIs, SQL, Docker, and cloud technologies.
- Built capabilities involving GenAI/RAG, predictive modelling, document and data processing, reporting, testing, monitoring, and system integration.
- Collaborated with clients and technical contributors to clarify requirements, demonstrate solutions, troubleshoot issues, and improve delivery readiness.
- Prepared technical documentation, testing outputs, deployment notes, and handover materials.

AI Project Intern | Genesis Group Inc. / Genesis AI Garage | St. John's, NL

Sep 2024 - Dec 2024

- Supported machine-learning experimentation, data preparation, model evaluation, and technical reporting for confidential project work using Python, anomaly detection, time-series analysis, and AWS-based analytics tools.
- Supported dashboard reporting, documentation, and presentation of technical findings, helping translate analytical results into practical recommendations.

Data Analyst Intern | Stella's Circle & Choices for Youth | St. John's, NL

Jun 2024 - Aug 2024

- Cleaned, standardized, and transformed program datasets into structured, integration-ready formats, including JSON outputs for downstream use.
- Built KPI dashboards and reporting summaries, and improved reporting quality through validation checks, consistent formatting, and documented transformation logic.

Community Researcher Intern | Canadian Council on Rehabilitation and Work | St. John's, NL

Feb 2024 - Apr 2024

- Collected, organized, and analyzed employment-access data and prepared concise summaries of trends, barriers, and practical insights for workforce inclusion initiatives.

Research Assistant | Visual and Analytic Computing Lab, Memorial University of Newfoundland | St. John's, NL
Oct 2023 - Dec 2023

- Supported applied AI and data research through dataset preparation, preprocessing, model experimentation, visualization, image/medical-data analysis, and reproducible documentation.

IT Admin & Data Analyst | Vision One Consultancy | Phnom Penh, Cambodia / Remote
Jan 2022 - Jul 2023

- Built dashboards, automated ETL processes, and improved data quality for business reporting and operational decision-making.
- Analyzed operational data and user logs to identify trends, issues, and process improvements, translating business needs into KPIs and reports.

Data Science Intern | Maxis Berhad | Kuala Lumpur, Malaysia
Sep 2019 - Feb 2020

- Performed data preparation, outlier detection, exploratory analysis, and built Power BI and Tableau dashboards to communicate operational trends.

SELECTED CASE STUDIES (PUBLIC SUMMARIES)

- **Environmental Forecasting & Anomaly Detection:** Built forecasting, feature-engineering, thresholding, offline-evaluation, dashboard-reporting, and monitoring handover workflows for operational sensor analytics. Proprietary data and production code are not shared.
- **Document Intelligence & RAG:** Developed ingestion, parsing, chunking, embeddings, semantic retrieval, metadata filtering, and structured LLM response workflows for document-heavy business use cases.
- **Agentic Recommendation & Ranking:** Tested and improved retrieve-rank-reason workflows, metadata handling, ranking logic, and validation for product discovery, supporting demonstration and rollout planning.
- **B2B AI/Data Analytics:** Supported AI workflow design, retrieval logic, structured outputs, monitoring documentation, and production-readiness planning for business insight generation.

EDUCATION

Master of Artificial Intelligence
Memorial University of Newfoundland, Canada | Sep 2023 - Dec 2024

Bachelor of Computer Science, Artificial Intelligence
University of Malaya, Malaysia | Sep 2015 - Feb 2020

CERTIFICATIONS

- AWS Certified Machine Learning Engineer - Associate, Amazon Web Services | Issued May 2026 | Expires May 2029
- Mitacs Invention to Innovation Skills Training, SFU Beedie Executive Education | Issued Jun 2025
- AWS Academy Graduate - AWS Academy Cloud Foundations, Amazon Web Services | Issued Jan 2020
- Introduction to Data Analytics for Business, Coursera | Issued Jul 2020
- Getting Started with AWS Machine Learning, Coursera | Issued Jul 2020
